Now you can make the most of up or down markets, because

**YOU'LL KNOW THE DIRECTION OF THE  
MARKET BEFORE IT HAPPENS!**

Trade indexes or individual stocks with astounding results!

See the proof inside

# **The Trading Secret Of The Pro's ... Now Available To All Investors Who Want To Make A Lot Of Money!**

Now you will know the future direction of the market, in any time frame, with just a click of your mouse! Look 4 1/2 hours into the future with our intra-day charts. Pick optimum entry and exit points. Look 20 days into the future with our daily charts. You'll always be on the right side of the market!!

## **Try it risk-free for 30 days!**

Dear Investor,

First, let me get something off my chest:

**The Whole Idea of Making Money on Stocks Using So-Called "Indicators" is About as Valid as an Enron Financial Statement!**

Think about it. If just one of these indicators worked, you wouldn't need the literally hundreds of others. Sure, they all work sometimes. Bullish chart patterns work when the market goes up. Bearish chart patterns work when the market goes down. Big deal.

Here's the truth. The secret to making money in the stock market is being on the "right side of the market." It's fundamentally simple: Buy when the market is going up, and sell when the market is going down. That's it.

Easy to say, hard to do -- unless you have the market-predicting high tech computers and software that only large brokerages can afford. These wealthy and successful brokerages already have and use this powerful "black box" technology to produce sophisticated computer programs which successfully predict the future direction of the market in any time frame.

**The good news is that now, for the first time ever, this high-powered, big-profit technology is available to you!**

---

## **STOCK MARKET SECRET:**

**Market direction is much more important than individual stocks. When the market goes up or down, 85% of the stocks go with it.**

---

## The Profit Power of "Neural Networks"

Here are some details of how our "Neural Network" can forecast future moves of stock markets to make you rich:

Neural networks are built much like the human brain, except they also use the advantages of the conventional digital computers. These advantages provide faster and more "intelligent" analytical reasoning. Once trained, they will always behave the same way under identical conditions, as opposed to changing human behavior, and they can interpret, and learn, from new data.

This process will assist you in making before-the-event trades that will help you make a fortune by trading with the trend of the major market indices!

Of course, computers cannot read the future. They can't predict a surprise earnings warning or a market moving news event. What they can do is forecast the internal bias of the market, resulting in overall accuracy of 70% to 80%. Visit our website at <http://www.tradingpro.com/html/accuracy.html> to learn more about the forecast's accuracy.

## Tradingpro.com Gives You The Information You Need To Trade With Pinpoint Accuracy!

There are many well-known and respected traders out there selling their stock picking courses and seminars. Their methods use complicated analysis and indicators that are supposed to help you choose the right stocks to buy.

But the truth is ... smart traders don't focus on or pick stocks at all. They know that if you know the direction of the market for any given period, you could throw a dart at a list of stocks and come out a winner!

If you own a stock, and the market is going up, chances are 85% certain that you'll make money. If you own a stock, and the market is going down,

chances are the same that you'll lose money. It really is just that simple.

During the Bull Market of the 90's people who didn't know a stock from a stick were making a fortune. Dot.com companies that were losing money hand over fist were *still* going higher each day. The old saying is true: "In a Bull Market, everyone is a genius."

During the past couple of years (and especially since Q3 of 2001) the Nasdaq market has dropped over 50% in value. People who still trade with that "Buy and you can't lose" mentality will watch their profits get washed away. **The bottom line is that to make money in stocks you have to be on the right side of the market.** Being on the wrong side of the market is the kiss of death in trading. And this goes for any time frame be it yearly, monthly, daily or hourly.

That's why, with billions of dollars to manage, the large brokerages have banks of computers working around the clock determining market direction. Once a trend has been determined, these computers are programmed to buy or sell stocks depending on the direction of the trend and re-enforcing it. The brokers themselves are only there to watch the computers. They make very few trading decisions on their own.

Since this technology has never been available to the public, the average trader, like you, was at the mercy of these large institutions. That is until now!

### **Now With The Click Of Your Mouse -- You Can Know The Future Direction Of The Market, For Any Time Frame, And Then Profit From It!**

With billions of dollars at stake, it's no wonder the large brokerages use the most accurate tool available. It's the only method for making a profit that totally eliminates human error and judgement.

Our forecasts cover all major U.S. indices, as well as stock markets throughout the world, with equal accuracy.

With TradingPro.com you can have the same ability to see into the future and make accurate and profitable trading predictions every time! Using a sophisticated "Neural Network" you will, each hour of each day, have charts of the future direction of the market.

Without getting too technical, a "Neural Network" is a computer program that "thinks" and is able to learn from past data. It applies what it has learned from the past to create an accurate prediction of future markets.

Under development since 1992, our neural network is able to produce intraday and daily charts of all major indices. **The intraday chart looks 4 1/2 hours into the future and is recalculated every 15 minutes. It points out both market direction and intraday pivot points. The daily chart looks 20 days into the future and is recalculated each day.**

### **Three Easy Steps To Trading (And Profiting) Like A Pro!**

Now this tool is available to you and it will help you make more money than any other method or newsletter you'll ever find. It's a proven system that works. Here's how it will help you ...

## **\$\$\$ Profitable trading without the usual risk or guessing! \$\$\$**

The forecast is shown in black.  
In red is the actual Market movement.

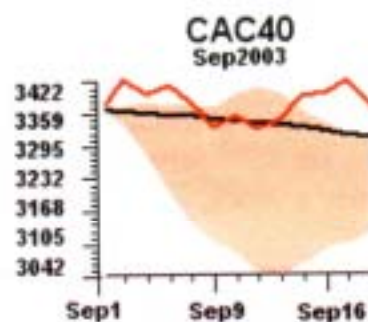

**Advanced computing predicts the future of markets with remarkable accuracy!**

The pink area is the error or "confidence" band.

**When you log on to Trading pro.com you'll see charts like these along with data and other information.**

**1 - Use Our Daily Charts To Look Into The Future and Determine The Direction Of The Market.** An informed investor knows that focusing on the indexes, and not on individual stocks, is how to make money. Stocks simply follow the indexes. If you know before hand the future direction of an index, you will know in advance what action to take to a make a profit. Buy the strongest stocks when the market is going to move up. Short the weakest stocks when the market is going to move down.

**2 - Use Our Expert Selections To Choose Momentum Stocks Ready To Make Explosive Moves To The Long Or Short Side.** Focusing on the movement of the indexes also helps you make big money on individual stocks. Each day you will receive the best stocks to buy or sell short!

**3 - Use Our Intraday Charts to Determine Optimum Entry Points For Short Term Trades (Day Trades) or Swing Trades (Three To Five Day Trades).** TradingPro.com is a day traders dream tool! Don't want to follow the market, but still move on individual stock? You will get updated data every 15 minutes all through the trading day. As long as the markets are open, the computer will churn out updated data that you can rely on to help you make money! (plus it will output data for the next trading day!)

## Forget About The Stock Picking Method of Investing! Use This High-Tech Method To Build A Million Dollar Portfolio Next Year!

When you focus on market direction instead of picking stocks you cut out all that is risky about investing. Armed with before-the-fact knowledge, you will not be affected by news reports, human error, misinformation or sentiment. And the stress of wondering

## These investors already know the profit value of this market timing service ...

*"I have been tracking the performance of this system for the entire year. I do so by trading both sides of the market, long and short, using leveraged mutual funds which are based on the performance of the Nasdaq 100. My profits have been very, very good. I am pleased with this service and am glad that I discovered it while searching the net for trading systems."* - Jerry Schaefer

*"Among some of the existing sites out there, your site seems to be the best in terms of offering analytics. Another one we know of is Tradetrek but your site is much more focused and well designed."*  
- Eugene Grunsted

*"I am a loyal 52 year old client and I think your service is wonderful. Trading is what I do for a living and you are still the most astute trader I have ever had the experience of working with."*  
- Mark Goran

*"I have been a subscriber for several months and think the service is great. I periodically cut out the advisory services that don't work, but yours is here for the long haul."* - William Burke

*"I love your service. So far I am doing great. Thank you very much."* - Roger Rhoten

*"I am impressed with the accuracy of the stock price direction indicated in potential plays."* - Rich

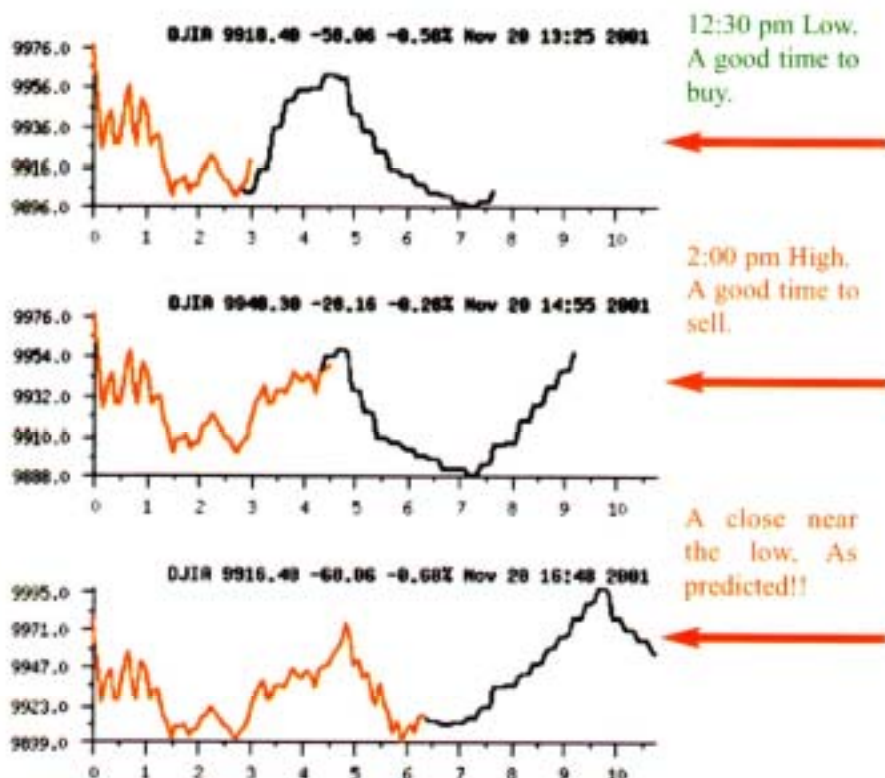

*"I think your service is terrific. It helps me get focused and still do other activities."* - Dennis M.

*"This is great advice and insight. Your experience helps us and is a real value."* - B. Jackson

*"Just want to tell you how much I appreciate your service. To be honest with you, it's what gets me up in the morning."* - Hal Murphy

*"I have learned more in these past few weeks than I know I would have learned in years."* - L.Gomez

**www.TradingPro.com**

Here is an example of the evolution of the prediction for the DJIA for Nov. 20th, 2001. The daily forecast begins at 9:30 am Eastern Time, when the market opens (zero on the graph) and ends at 4:00 pm Eastern Time (6 1/2 on the graph) when the market closes. The prediction is in black, and the actual movement of the market is in red. The prediction at the close is for the next day's trading.

Note that a low is predicted for 12:30 pm Eastern time (3 hours into the trading day), a high at 2 pm (4 1/2 hours into the trading day), and a close near the day's lows (6 1/2 hours into the trading day).

The forecast is for a rally the next day peaking at about 1 pm (3 1/2 hour into the trading day).

The forecast is recalculated every 15 minutes and adjusted for inaccuracies and unforeseen events.

whether you made the right move will be eliminated. Once you can *see* the direction of the market, you will trade with dead-on accuracy!!

This is the best investment tool for everyone from casual investors to intense day traders. Even if you only have time to look at market direction once a day, it will be well worth it.

All you have to do is log onto Tradingpro.com when you want or need to, or as time allows. All the charts, data, analytics and any other information you need will be there, updated every 15 minutes -- to give you a look 4 1/2 hours into the future. And the daily charts look 20 days into the future. Take our information and make your trades long or short depending on the forecast. (We also suggest the best momentum stocks to use to take advantage of these moves.) You'll find no better or more accurate information anywhere!

It's absolutely true that the best stock picker in

the world can not make money investing against the market. Even though many "gurus" will try to convince you that they can.
