Dear Fellow Investor,

The days of being able to make money buying any momentum stock at any price are over.

To make big profits in today's stock market, you need the right technical indicator that tells you when to get in and out of a stock.

My technical indicator will make you huge profits. It's fast, easy, proven ... and your satisfaction is guaranteed or you don't pay a penny.

Best of all, this indicator will take the gut-wrenching emotions and guesswork out of your stock or option trading so you can sleep easy.

Here's one actual example from dozens.

IMMUNOGEN (NASDAQ:IMGN) was \$13 a share on July 1st. Most people who bought it sold out because it was flat for the next six weeks (i.e. no profit). When our indicators recommended it on August 15th, it rose from \$13 to \$34 a share in less than one month.

A 152% PROFIT in 4 weeks, or 0% profit in 6 weeks -- it's your choice.

(over, please ...)

My Confession

I was NOT a technical trader until just 6 months ago. Before that, I racked-up profits many times the market averages by momentum investing. But everything changes.

If you keep the same momentum, or buy-and-hold strategy that no longer works, you will be robbing yourself of a fortune in profits -- not to mention your lifestyle, security and peace of mind.

Why 99% of Investors In This New Stock Market Will Lose Money or Match The Averages -- While 1% Will Get Filthy, Stinking Rich

The stock market has changed, like everything does in the investment world.

Today's new stock market will last through the year 2003, I predict, because of my study of centuries of stock history.

You will either get very rich, lose money or tread water ... depending on whether or not you are open-minded enough to embrace, rather than fight, this new stock market.

This chart explains it all ...

Why "Buy and Hold" Doesn't Work Any More

LVL stock was at \$65.50 on 9/3/99 and was at \$68.50 one year later.

If you followed a traditional Buy and Hold strategy, you made \$3.00 that year.

One Year of Buy and Hold = 4.5% profit.

But if you bought on the dips and sold on the highs of the same LVL stock throughout the year based on my technical indicator, your profits would have looked like this:

9/3/99	Buy	@ \$65.50	
12/30/99	Sell	@ \$81.35	PROFIT = \$15.85
1/7/00	Buy	@ \$72.50	
2/7/00	Sell	@ \$113.00	PROFIT = \$40.50
2/25/00	Buy	@ \$110.13	
3/8/00	Sell	@ \$127.00	PROFIT = \$16.87
5/25/00	Buy	@ \$72.63	
7/5/00	Sell	@ \$87.63	PROFIT = \$15.00
8/27/00	Buy	@ \$69.75	
9/5/00	Sell	@ \$81.25	PROFIT = \$11.50
			\$99.72

One Year With My Technical Indicator = 152.2% profit.

You see, every smart investor knows this about the real Wall Street: while they tell investors to look at the long term, they make their big profits on these short term trades!

Why These Breakout Stocks Can Make You Profits of 100% or More In Just Days or Weeks!

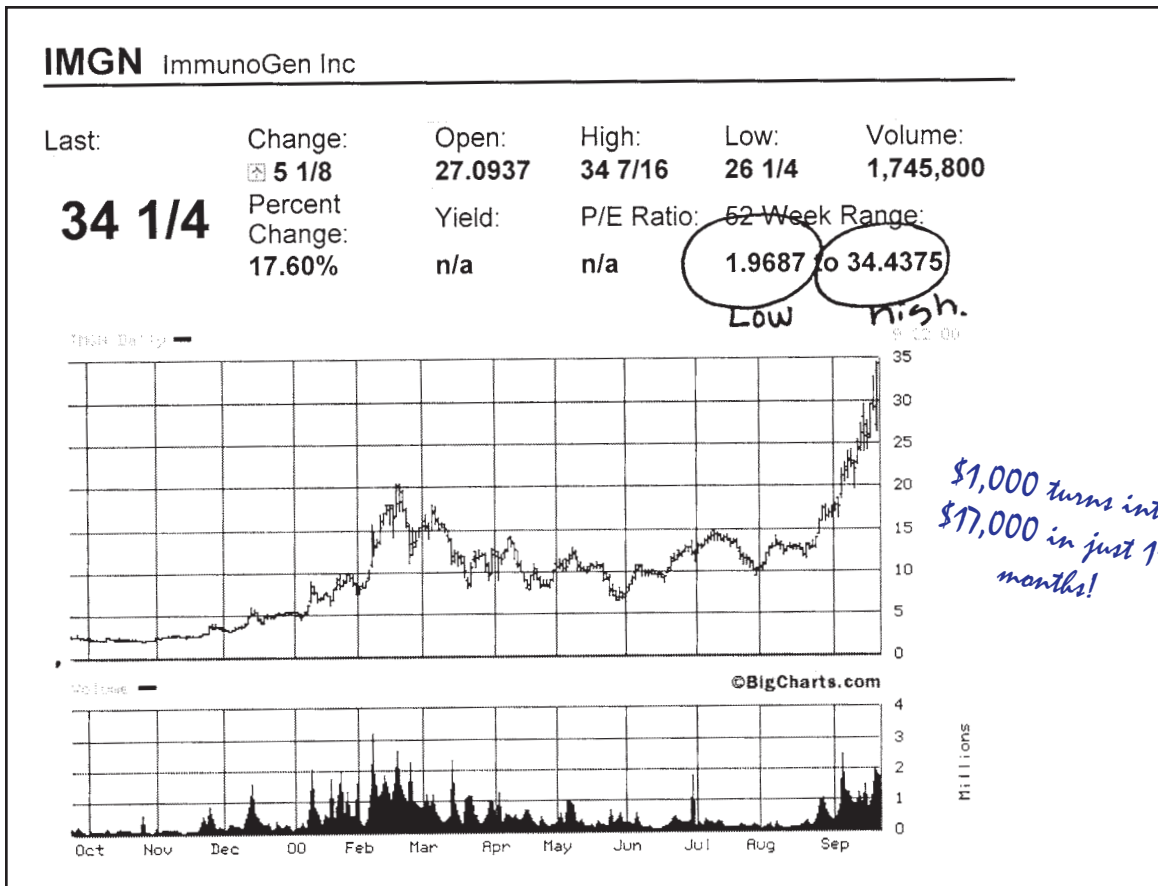

Strong trend ... Huge buying by smart traders ... big news ... my technical secret screams "BUY NOW!"

The "breakout stocks" we focus on move in price by up to 25% or more in just a week! They often move 100% or more within just a month or two!

You can reap windfalls from these Quick Moves in either stocks or options! (A 25% move in price can double or triple your money in options.)

Ride "Grand Slam" Stock Winners ... Like Immunogen Which Turned \$1,000 Into \$17,000 in 11 Months!

Most investors never heard of IMMUNOGEN (NASDAQ: IMGN) when my Technical Indicator said "Buy" at \$2 a share on January 2, 2000. It kept saying "Hold" to \$34 a share by November.

**Make Huge Stock Profits Faster
Than You Ever Thought Possible!**

If you're the type of investor who's willing to wait 30 years for your nest-egg to multiply, then I am NOT the right person for you, and you should ignore this letter.

But ... if you want to make giant-sized profits quickly ... faster than you ever thought possible ... you won't find a better way than this!

The fact is, my trading often makes the profits in a few weeks that it takes most investors a year or two to gain.

What's wrong with getting wealthy fast?

**Best of All ... LOW RISK ...
Because I Absolutely HATE to Lose Money!**

Now if you have any fears of investing my way because you think it's risky, let me reassure you:

This is a safer, lower-risk way to invest than most others!

You see, I limit risk severely through several simple techniques because I hate to lose money, and I'm sure you do too!

And if a stock doesn't move fast, we sell it because we don't want to be bored or have "dead" money!

**Easy, Simple, Fast ... You Will Know Exactly When To
Buy and Sell the Right Stocks For
Maximum Profits and Lowest Risk!**

Don't let emotions keep you from making a fortune. I have completely eliminated emotions from my system because they are very destructive and costly.

You'll know exactly which stocks and options to buy ... when ... at what price ... and when to sell for big profits before they fall back ... all simple and easy with my "Technical Trading Riches" manual.

**You Don't Have to Risk One Penny of Real Money
To Prove What I Say!**

Even if you're not quite ready to risk real money yet, go ahead and "paper trade" my stock and/or option picks. See if

I really make you a lot of money. If not, cancel and you'll get a refund with my 100% no-risk guarantee.

How Long It Takes to Turn \$10,000 Into \$1 Million

Yes ... my goal is to give you the method (and actual stock recommendations) to take \$10,000 and have it become \$1 million or more as quickly as possible.

Starting with \$10,000, you'll have \$1 million in just over 5 years if you make 150% a year, in 6 1/2 years if you make 100% a year, in 11 1/2 years if you make 50% a year from my technical trading.

Only technical stock trading can make you this wealthy, this quickly. Forget the old days. If you buy and hold and make 15% a year, it will take you a very long 33 years to reach \$1 Million.

Takes Just 28 Minutes A Day or Night ... And No Software or Chart Books Needed!

That's right. Once you have my "Technical Trading Riches", you won't need to buy anything else. NO expensive software. NO newsletter. NO pricey chart services.

I spend an average of less than 30 minutes on each market day (28 minutes, to be precise) -- and that's all you'll need too.

Even better, it doesn't matter if it's before, during or after market hours.

Make a Fortune in Up or Down Markets!

I want to make money ... lots of it ... every single day, week and month. Of course everybody knows that's impossible long-term, but with my simple "Technical Trading Riches" ...

... you can make as much or more money in flat and down markets as in up markets!

For example, my indicator found Terayon Communications (NASDAQ: TERN) just before it fell from \$135 to \$40 ... a nearly four-times-your-money profit by shorting in just six weeks!

**Only \$39.95 With a 1 Year Money-Back Guarantee ...
PLUS You Get My Actual Picks FREE For 1 Month ...
When You Reply Within The Next 7 Days Only!**

TERN chart here

I want open-minded, profit-driven people like you to have this so bad that I'm practically giving it away.

Here's the deal. I'll rush you "Technical Trading Riches" manual. It's simple, easy-to-read, and if you are not 100% thrilled with it for any reason, just return it any time within 1 year for a full refund -- no questions asked.

I'll also rush you my special web site where I'll give you my actual stock and option picks for every market day **FOR 1 MONTH ABSOLUTELY FREE**. This way, you don't have to do any work or even read my manual.

All for only \$39.95 postpaid. But only if you return the enclosed form, fax or call within the next 7 days. Please don't wait and lose out.

To Your New Riches,

Mikey Topanga

Michael D. ("Mikey") Topanga, Sr.

P.S. I plan to stop selling "Technical Trading Riches" soon when I reach a limited number of orders so it remains easy for "us" to make huge money fast.
